Waste Management Policy

Govt. Bikram College of Commerce, Patiala has sustainable waste management strategy to provide safe and healthy surroundings to all employees and students. The purpose of formulating this policy is to establish suitable action plans of waste management and to ensure their implementation. The institution has very strong determination to not to harm the natural environment. Hence, institution will make efforts to implement the suitable action plans to achieve aim of environment friendly clean and green campus. The institute will adopt the principles of the best practicable environmental friendly options in the delivery of its waste management services. The Institution promotes water conservation by water harvesting. The College shares the process and practices with students and local community for the promotion of clean environment. The policy focuses on the proper management of E-waste generated in college campus.

Objectives:

- To promote sustainable and holistic approach for the waste management and green initiative.
- To popularize possible practices of waste management.
- To develop new ideas and concepts of waste management.

Solid Waste Management:

- Waste produced in institution premises is collected, segregated and stored in three separate colored bins meant for biodegradable, non-bio-degradable and hazardous wastes and is handed over to authorized waste pickers/waste collectors of Municipal Corporation from time to time.
- Daily sweeping of roads, class rooms, departments, washrooms and hostel.
- RO water supply is installed for students to avoid the carrying of plastic bottles. Single use plastic is strictly banned in canteen area.

- Plant residue waste generated from institution is collected and dumped into compost pit.
- The institute has 'zero tolerance policy' for Use and Throw items like plastic cups, plates, cans etc.
- Only reusable glasses and cups and plates are used to serve food.
- Students are not allowed to throw or burn solid waste generated in classrooms, offices, laboratories, corridors, streets, roads, canteen etc. in open places.
- Reuse of one side printed paper for internal communication has been managed.

Water Waste Management:

- Minimizing wastage of water in campus is ensured.
- Reusing and recycle waste water originating from institution activities in a sustainable manner.
